### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

This Office Action is in response to the Remarks and Amendments filed April 11, 2005. Claims 1-73 have been cancelled. Claims 74-106 have been added, are pending and are examined herein.

Applicant's amendments have necessitated the withdrawal of the rejections of the previous Office Action. The following rejections now apply.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 74-106 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fishbein (USPN 6576659).

Fishbein teaches the treatment of wounds, in general, with an effective amount of oxandrolone (Abstract; col. 3, lines 20-23). Examples of wounds are punctures, incisions, excisions, lacerations, abrasions, ulcers and burns (col. 3, lines 51-56). Oral (systemic) and topical administrations are taught (col. 3, line 60-col. 4, line 14). Fishbein does not specifically teach the preferred dosage nor does Fishbein teach of the specific instances of wound treatment as claimed herein.

It would have been obvious to one of ordinary skill in the art at the time of the invention to treat the wounds as instantly claimed because Fishbein teaches the

treatment of wounds in general. Accordingly, absent a showing of unexpected results, the skilled artisan would have been motivated to treat each of the individual instances of wounds, as herein claimed, because of an expectation of success in treating the various species of wounds encompassed by the genus of wounds taught by Fishbein.

Furthermore, it would have been obvious to one of ordinary skill in the art at the time of the invention to treat wounds utilizing the claimed dosages because Fishbein teaches the treatment of wounds utilizing oxandrolone in general and it is well established that "where the general conditions of a claim are disclosed in the prior art, it is not inventive to discover the optimum or workable ranges by routine experimentation." *In re Aller*, 220 F.2d 454, 456, 105 USPQ 233, 235 (CCPA 1955).

### ***Response to Arguments***

Applicant's arguments filed April 11, 2005 have been fully considered but they are not persuasive.

Applicant argues, "None of the references cited by Examiner teach or suggest the desirability of selecting an amount of oxandrolone that would provide the claimed oxandrolone concentration." This argument is not persuasive because, as stated above, "where the general conditions of a claim are disclosed in the prior art, it is not inventive to discover the optimum or workable ranges by routine experimentation." *In re Aller*, 220 F.2d 454, 456, 105 USPQ 233, 235 (CCPA 1955).
